

Student Senate Resolution SS0405-14

Whereas the University Counseling Center exists to meet the mental health needs of the Notre Dame community,

Whereas, the University Counseling Center has no direct link to the undergraduate student body to facilitate communication and awareness of mental health issues,

Whereas the residence hall governments provide the most effective structure for communication between the University Counseling Center and the Notre Dame student body,

Whereas the creation of a University Counseling Center/Mental health commissioner for each residence hall would facilitate communication and awareness between the student body and the University Counseling Center,

Whereas Student Senate exists for the betterment of the undergraduate student body, which includes the area of mental health,

Therefore be it resolved that Student Senate support the creation of a University Counseling Center/Mental Health commissioner to residence Hall Governments and Off-Campus Government to facilitate communication and awareness of mental health issues between the University Counseling Center and the student body.
