

JUDICIAL COUNCIL
University of Notre Dame

April 1, 2019

Members of the Student Senate,

It is with great pleasure that I present to you Thomas Davis, my nominee for the position of Student Union Parliamentarian for the 2019-2020 term. According to Section 2.5 of the Constitution of the Undergraduate Student Body, “The Parliamentarian shall advise the Chairperson of the Senate and Campus Life Council regarding parliamentary procedure and *The Standard Code of Parliamentary Procedure.*”

The Parliamentarian is tasked with guiding both Senators and other members of the Student Union through uncertainty with respect to the Constitution and parliamentary procedure. Any procedural questions or discrepancies will be addressed to the Parliamentarian. The Parliamentarian also serves on the Executive Cabinet as an advisor and source of input for the initiatives of Student Government. Additionally, the Parliamentarian shall serve as a non-voting member of the Election Committee to impartially advise the committee on all constitutional matters.

Originally from Binghamton, NY, Thomas currently resides in Dunne Hall. Thomas is an active member of the Notre Dame community, serving as a tutor within the Academic Services for Student Athletes, advising fellow in the Matriculate program on-campus, and as incoming co-president of the Alexander Hamilton Society. His experience and qualifications for the role of Parliamentarian extend to his involvement in FUEL and his leadership of a task force to rewrite his high school’s constitution.

I am fully confident in Thomas’s ability to serve as Parliamentarian. He has demonstrated great enthusiasm for the role already and possesses the skills necessary to effectively communicate with, and across, the different branches of the Student Union. Due to his impartiality, unparalleled experience, attentive nature, and commitment to serving the constitutional mandate of the Student Union, I fully endorse him for the position.

Respectfully submitted,

Halena Hadi
President, Judicial Council
